

Information on the Construction of the Church of the Holy Translators in Ayb Learning Hub

The construction project of the Church of the Holy Translators in Ayb Learning Campus (Hub) was launched in 2012. The preliminary cost estimate of the project comprised about 2 billion AMD. Through donations by our benefactors (the list is available [here](#)), AMD777,6 million or 38.9% of the preliminary cost estimate has been raised. In 2012-2018, AMD73.6 million was spent on the design and earth works (by Haynakhagits OJSC and Gashes LLC respectively). An

open international [bidding](#) was announced to select the best architectural concept for the construction of the Church of the Holy Translators; 119 individual architects and organizations from Armenia, Russia, Spain and the USA participated, and the design by architect Erik Ohanyan was selected among the 50 architectural concepts. In 2014, through a similar bidding procedure, the construction company was selected as well.

Since only 38.9% of the required amount has been raised so far, the church construction will be launched once the envisaged total amount has been fully obtained. Meanwhile, financial reports on the money donated and expenditures made are regularly submitted both to the benefactors and public (accessible at the [official site of the Foundation](#)).

We are grateful to all our supporters and benefactors for their trust in Ayb's mission and support in the implementation of our projects. It should be reminded that Ayb has no owners or shareholders and that all our projects are implemented mostly via support from Ayb community and the benefactors. The Foundation continues to actively raise funds for the construction of the Church of the Holy Translators, especially since investments for several of our priority projects, including the construction of a new wing for Ayb School, have already been made. We are sure the Church of Holy Translators will serve everyone as a spiritual center of community importance.

About Ayb School Campus and the Church

Ayb School Campus comprises four areas: educational (elementary, middle and high schools), sportive (gyms, playgrounds and a pool), social (a fab lab, a science and technology museum, dormitories and

a kindergarten) and spiritual (the church and the community center). Ayb is a unique continuation of the Holy Translators' movement. For centuries, the Armenian Church and the Armenian School have ensured, hand in hand, the spiritual and national unity of our people and harmony between cognition and values.

The Church of the Holy Translators is going to pertain to the Armenian Apostolic Church and the Mother See of Holy Etchmiadzin, to serve not only the population of Kanaker-Zeytun and Arabkir Districts but also all other believers. The Church of Ayb School is going to be a structure with unique architectural solutions, made up of stone books, each symbolizing a Holy Translator.
